

Word of Faculty of Science, Cairo University

Dean's Message

Sons and daughters, I have the honor to welcome you at the Faculty of Science, Cairo University. I hope you gain knowledge, skills and knowledge that equip you to assume important positions in professional forums. The Faculty of Science professors and commissions are distinguished by their concern in achieving the highest quality standards in the educational process by since its establishment in 1925.

And you will find a family atmosphere at your faculty in which all professors, commissions, and employees cooperate to provide you a scientific guide to get progress and genius in all the years of your studies.

I advise my sons and daughters to attend your lectures and scientific sessions regularly and not to hesitate to communicate with professors during office hours.

Pioneers and leaders have been graduated from the Faculty of Science achieving progress to our beloved Egypt. I have no doubt that you will achieve prosperity to our society and that scientists will come out from among you to rise the universal position of the faculty.

And I will keep my door open for you to facilitate the difficulties that may confront you with the assistance of the faculty vice deans and staff members.

About The Faculty of Science, Cairo University

The Faculty of Science was established on March 11, 1925. The annex occupies El-Zaafran saraya at El-Abbaseya. The study began at the college and was at that time the following sections: (Mathematics - Physics - Chemistry - Botany - Zoology - Geology), where most of the staff members were foreign, but a few of them were Egyptians. The Department of Mathematics was headed by Prof. Dr. / Ali Mustafa Meshrefa - and after that he became the first Egyptian Dean of the College on May 1936. Then the Department of Entomology was established in 1948. In 1950, the Faculty was transferred from the annex of El-Zaafran saraya at El-Zaafran to its current location at the university campus at Giza. After that, the Department of Meteorology and astronomy was established in 1966. The faculty was completed recently by establishing the Geophysics and Biophysics departments in 1982.
